RADIO BROADCASTING STATION
WSU
FOR THE INFORMATION OF

COPY

July 28, 1948

Mr. John Dunn
Director of Radio
University of Oklahoma
Norman, Oklahoma

Dear John:

Your suggestion regarding a proposal for the VOICE OF AMERICA program is interesting. I already have Frank Schooley's reactions.

I am wondering if you mean that the project might not be ^{under} ~~over~~ written by the State Department and sufficient funds supplied to install and operate the transmitters, as well as produce the programs, or to have the State Department supply sufficient funds for the educational institutions to produce the programs and transmit them by wire lines to the presently operating short wave stations. I am not sure but what this latter idea would be worthy of consideration. I am, however, inclined to agree with Frank Schooley that it would be a tough proposition to sell the educational institutions on putting up any money for the project.

Sincerely,

(Signed)

Carl H. Menzer
Director

CHM:pmp

Before the
FEDERAL COMMUNICATIONS COMMISSION
Washington 25, D. C.

In the Matter of

Amendment of Section 1.324 of the
Commission's Rules and Regulations

DOCKET NO.

Iowa State College of Agriculture and Mechanic Arts (WOI), Ames, Iowa;
Michigan State College (WKAR), East Lansing, Michigan; University of Oklahoma (WNAD)
Norman, Oklahoma; City of New York, Municipal Broadcasting System (WNYC), New York,
New York; and Cornell University (WHCU), Ithaca, New York, by their attorneys,
respectfully petition the Commission, pursuant to Section 4(d) of the Administrative
Procedure Act and Section 1.702 of the Commission's Rules, to institute public rule
making proceedings in accordance with Sections 4(a) and 4(b) of the Administrative
Procedure Act looking toward the adoption of the amendment proposed herein or a
similar amendment to Section 1.324 of the Commission's Rules and Regulations. In
support thereof, Petitioners show the following:

I. Preliminary Statement

1. On February 6, 1948, the Commission released a "Notice of Proposed Rule Making" proposing to amend the then existing Section 1.324 of the Commission's Rules and Regulations so as to provide that no special temporary authorizations would be issued for standard broadcast stations. Comments with respect to the rule proposed in that Notice were received from many persons and oral argument was held before the Commission en banc on May 7, 1948. The nine attorneys representing those who had filed comments without exception argued against the Commission's adoption of the rule it proposed. No testimony or argument on behalf of the proposed rule was submitted by any person or by the Commission. On June 28, 1948, the Commission released a Report and Order adopting the rule with respect to special temporary authorizations exactly as it had been proposed in the Notice of Rule Making released February 6, 1948. Various petitions in apposition to this Report and Order were submitted to the Commission. In a Memorandum Opinion and Order on Petition for Reconsideration, adopted August 26, 1948, the Commission denied each of these petitions.

II. Basis for Proceedings Requested

2. In its Report and Order, adopted June 26, 1948, and in its Memorandum Opinion and Order on Petition for Reconsideration, adopted August 26, 1948, both

referenced in Paragraph 1 above, the Commission stated reasons upon which it relied for abolishing the issuance of special temporary authorizations to standard broadcast stations. However, on October 12, 1948, the Commission enunciated a position directly contrary to the principal bases urged in support of the abolishment of such special temporary authorizations. In view of this complete change in position made subsequent to the adoption of the Commission's most recent action with respect to the amendment of Section 1.324, Petitioners submit that it is necessary for the Commission to conduct proceedings looking toward the adoption of an amendment to Section 1.324 of the Rules so as to provide for special temporary authorizations for standard broadcast stations, consistent with the Commission's most recent pronouncements.

3. The most recent statement of the Commission is contained in the Brief filed on October 12, 1948 on behalf of the Commission in the United States Court of Appeals for the District of Columbia, in re Easton Publishing Company, Appellant, v. Federal Communications Commission, Appellee (No. 9829). Relevant statements contained in that Brief are directly contrary to the position of the Commission in its Report and Order of June 26, 1948.

4. In its Report and Order, the Commission stated the following with respect to the granting of special temporary authorizations to standard broadcast stations:

"It is the opinion of the Commission that the problems raised in this proceeding must be considered in the light of the Commission's overall allocation plan with respect to broadcast stations as set out in Part 3 of the Commission's Rules and Regulations. That plan was formulated in accordance with the mandate of Section 307(b) of the Communications Act of 1934, as amended, that the Commission shall make such distribution of licenses, frequencies, hours of operation and of power among the several states and communities so as to provide a fair, efficient and equitable distribution of radio service to each of the same."

Thus, the basic question of the continuance of such authorizations hinged upon a fair, efficient and equitable distribution of radio service under Section 307(b) of the Communications Act.

5. A parallel discussion will be given to show how the principal reasons enunciated in the Commission's Report and Order have been rejected by the Commission. As shown, the Commission's determination with respect to special temporary authorizations was based upon allocations under Section 307(b). In determining, upon consideration of Section 307(b), to abolish special temporary authorizations for standard broadcast stations, the Commission stated in its Report and Order:

"At the time Section 1.324 of the Commission's Rules was adopted standard broadcast stations were the only means available for rendering broadcast service to the public. Today, however, new services are already in operation in many parts of the country and it is believed that stations of these newly created services, especially FM stations, will be in a position to broadcast the programs that formerly were broadcast pursuant to special temporary authorizations." (Underscoring supplied.)

Consequently, the Commission gave great weight in its determination that special temporary authorizations for standard broadcast stations should be abolished to its assumption that FM stations could broadcast the locally important programs involved. Nevertheless, in its Brief in the Easton case, the Commission stated with specific reference to the impact of Section 307(b) on this problem:

"Clearly in making station assignments in each of the services the Commission is required by Section 307(b) to make such distribution of facilities as will insure a fair, efficient, and equitable distribution of such facilities among the several states and communities. However, there is nothing in the Communications Act or the Commission's Rules and Regulations, and appellant has pointed to no provision, which requires the Commission to consider the existing distribution of facilities in one service in determining the appropriate distribution of licenses in another service. And an examination of appellant's contention makes clear that not only is the Commission's consistent policy of considering individual radio services separately, in making an equitable distribution among the various states and communities, a reasonable one which meets the requirements of Section 307(b) but that any intermingling of services as suggested by appellant, would inevitably result in greater rather than less inequity in the allocation of radio facilities." (Brief, Page 18) (Underscoring supplied.).

A comparison of this most recent statement of the Commission shows that its position taken at the time of abolishment of special temporary authorizations for standard broadcast stations has been abandoned.

6. Still other contrasts of the Commission's present position with the position taken in the Report and Order should be made. In determining to abolish special temporary authorizations for standard broadcast stations at this time the Commission said in its Report and Order:

"With respect to the consideration of the availability of FM service, the Commission believes that diligent efforts towards the establishment of FM service in individual communities will in the future more than adequately satisfy the public needs which have heretofore received nighttime broadcast service on an occasional basis from daytime or limited time stations operating on special temporary authority in these same communities."

From the above quote, it is clear that the Commission was still further urging that the availability of FM service removed the need for special temporary authorizations. That the Commission now believes that there is no merit in its own argument with respect to the present abolishment of special temporary authorizations for

standard broadcast stations is clearly shown in the following language in the Brief in the Easton case:

"In addition to these factors, based on approach to allocation, there are serious objections, based on the nature and present status of the newer services, to any consideration of other types of broadcast service in making allocations of standard broadcast facilities. As the Commission pointed out in its Memorandum Opinion (App. 62), there are many more AM receivers in existence than FM sets and most of the people who would receive service from one of the proposed AM stations which were the subject of the instant decision do not receive any FM reception and it is unimportant to them whether or not there is any FM service available in either of the competing cities." (Brief, Page 20)

The Commission supported its decision to abolish special temporary authorizations for standard broadcast stations principally on the argument that the locally important programs for which standard broadcast stations requested special temporary authorizations would be made available on FM stations, and that, therefore, the people would not be deprived of these programs. The Commission has now made it abundantly clear that there is no merit to this argument.

7. One more expression of the change in position of the Commission, fundamental to its contrary earlier determination that special temporary authorizations for standard broadcast stations should be abolished, must be emphasized. In the record in Docket No. 8722, with respect to which the Report and Order of June 26, 1948 was adopted, a number of participating counsel pointed out that many, if not most, requests for special temporary authorizations were made by part-time or limited time stations in communities which had no full-time standard broadcast facility. As the dissenting views of Commissioner Hyde to that Report and Order stressed, as of January 1, 1948 there were 1,049 radio communities of which 195, or almost 20%, had only a part-time or limited time station. Nevertheless, the Commission stated in its Report and Order:

"Clearly, many of the programs which have been broadcast pursuant to special temporary authority can in the future be broadcast by existing standard broadcast and FM stations presently authorized to operate full time and many of the programs formerly broadcast by stations pursuant to special temporary authority certainly are the type of programs to which existing full time stations should devote a reasonable amount of broadcast time." (Underscoring supplied)

In contrast to the Commission's position here enunciated, the Commission stated in its Brief in the Easton case, in addition to the quotation above showing that FM receivers were not widely distributed, that:

"On the other hand, during the developmental stage of the newer media, since FM and television stations are generally constructed and operated initially in the large centers of population and business activity, these areas would, under appellant's theory, necessarily find themselves at a disadvantage in any competition for AM facilities with areas in which FM or television development has progressed at a slower pace, solely because of their relative progress in establishing the newer types of service." (Brief, Page 19)

The Commission must recognize that the approximately 195 radio communities which have only a part-time or limited time station are located in rural areas. Wholly aside from the lack of distribution of FM receivers in those areas, the above quotation shows that the Commission itself is aware that FM (and television) stations are generally constructed in large urban areas. Thus, even if the Commission wished to impose upon residents of rural areas the need to buy an FM receiver in order to obtain locally important programs, transmission facilities for those programs would be unavailable. Petitioners assert that it is contrary to the public interest, and therefore violative of the mandate in the Communications Act, for the Commission to ignore the need of approximately 20% of the radio communities in the United States for an opportunity not otherwise available to receive locally important programs.

8. Petitioners have illustrated that the Commission's position as of October 12, 1948, when it filed its Brief in the Easton case, constituted a complete departure from the reasons principally relied upon for abolishment of special temporary authorizations for standard broadcast stations. That the Commission still subscribes to the position taken in the Brief in the Easton case was made abundantly clear in the oral argument made on behalf of the Commission only five days ago (November 18, 1948) in that case before the Circuit Court of Appeals for the District of Columbia. Commission counsel devoted the major part of his argument to a showing of the distinction between AM and FM service and emphasizing, in response to the Court's inquiries, that it was necessary for the Commission to consider these two services entirely apart in following the Congressional mandate given in Section 307(b) of the Communications Act. Commission counsel in that argument reiterated the points contained in the Easton Brief discussed above, repudiated none of those points, and stated categorically that the Commission's position was that FM grants in an area could not be a basis for determining authorizations in the standard broadcast service in that area. Obviously, then, the Commission has completely abandoned its position taken in its Report and Order of June 26, 1948, that the possibility that there might be FM grants in an area should control AM authorizations in that area.

III. Proposed Rule for Special Temporary
Authorizations for Standard Broadcast
Stations

9. Petitioners submit that they have pointed out in Part II above that the Commission has abandoned the principal basis upon which it relied for abolishing special temporary authorizations for standard broadcast stations. Under these circumstances, it is clear that the Commission must at this time reexamine its Rules with respect to such service in the light of current facts and the Commission's own adoption of a completely contrary position to that which it held at the time the present Section 1.324 was promulgated. Petitioners, therefore, propose that the Commission abolish the present Section 1.324(b) of its Rules and Regulations and adopt in lieu thereof the following amended Section:

Section 1.324:

(a)

(b) Special temporary authority may be granted for the operation of a standard broadcast station for limited time, or in a manner and to an extent, or for service over and beyond that authorized in an existing license, upon proper request therefor. No such request will be considered unless it is received by the Commission on or before fifteen (15) days prior to the date of the proposed operation. A request within less than fifteen (15) days may be accepted, upon due showing of sufficient reasons for the delay in submitting such request.

(1) The request shall show the following matters:

(A) The period or periods of time for which the special temporary authorization is requested. Approval will not be granted for periods in excess of thirty (30) days;

(B) A full description of the nature and character of the programs proposed to be broadcast, including a statement as to whether the program will be broadcast on a commercial or sustaining basis;

(C) Whether regularly licensed standard broadcast stations serving substantially the same area as the

station making the request will broadcast the program or programs described in (2), supra.

The call letters of such other stations must be set forth.

(2) The request shall be accompanied by an affidavit showing proof of service of a copy of the request upon:

(A) All stations whose operation may be subject to objectionable interference as determined by the Standards of Good Engineering Practice concerning Standard Broadcast Stations;

(B) All Class I stations on the channel, if the request is for operation on a clear channel;

(C) All stations with which time is shared, if the request is made by a time-sharing station.

(3) Any station receiving a copy of the request shall submit directly to the Commission a statement of its objections to the granting of the request, accompanied by an affidavit showing proof of service of a copy of such statement of objection upon the station making the request. The statement of objection must be filed with the Commission five (5) days prior to the proposed broadcast, or else it will be considered that such station has waived any objections to the granting of the request.

(4) The statement of objection shall include, but shall not be limited to, a showing of the following matters:

(A) The extent of interference which may be caused to the operation of the objecting station, setting forth the areas and populations affected;

(B) The nature and character of the programs proposed to be carried by the objecting station during the period for which special temporary authority is requested;

(C) A statement as to whether other existing stations serving the population and areas set forth in (1) supra, render programs of similar

nature and character as that described in
(2) supra. If it is claimed that certain
areas and populations would be deprived of
a unique program service as a result of the
granting of the request for a special tem-
porary authorization, a full statement of
facts in support of such claim must be
submitted.

CONCLUSIONS

1. Petitioners submit that they have shown that the Commission has completely rejected the views upon which the present Section 1.324(b) of the Commission's Rules, abolishing special temporary authorizations for standard broadcast stations, was based. Petitioners submit that the Commission's most recent enunciations demonstrate that such special temporary authorizations should be permitted under proper circumstances. Petitioners further submit that the amendment proposed above to Section 1.324(b), upon adoption by the Commission, would permit proper determination by the Commission in individual cases of the need for granting special temporary authorizations in the public interest.

WHEREFORE, Petitioners pray that the Commission, pursuant to Sections 4(a) and 4(b) of the Administrative Procedure Act and Sections 303(a) (b) (c) (f) and (g) of the Communications Act of 1934, as amended:

- (1) Order public rule making proceedings, including a full and fair hearing, to determine whether the aforesaid proposed amendment to Section 1.324(b) of the Commission's Rules and Regulations, or a similar amendment to that Section looking toward the granting of special temporary authorizations to standard broadcast stations where the public interest would be served by such grants, should be adopted; or
- (2) In the event the Commission does not grant this request for public rule making proceedings, including a full and fair hearing, afford

Petitioners the opportunity to present oral argument en banc on the merits of this Petition.

Respectfully submitted

Educational Broadcasters Propose Steps for Developing Facilities

Educational institutions were urged to take "bold steps in developing facilities" for radio, and educational radio stations were asked to serve as "pilot plants" for the radio industry by twenty-two educational broadcasters who met ~~last week~~ ~~last week.~~

The group, meeting at the invitation of the Rockefeller foundation and the University, made 12 recommendations after the two-week Rockefeller seminar on educational broadcasting which closed Saturday.

12 Proposals Made

Among the recommendations to educational broadcasters were proposals to assess community needs and resources, develop new techniques, build audiences, and develop appropriate areas of research and "pilot plant" experimenting.

The participants stressed that educational stations offer "unequal opportunity for pilot plant study because of research talent readily available, freedom from commercial commitments, and ability to vary control factors." While there has been much research in certain areas, the educators said that information is still vitally necessary in qualitative program evaluation, the effects of programs on audiences, the flow of listening at different hours, and response to types of programs.

A fifth recommendation to educational broadcasting was for the training of competent personnel,

through internships or in-service training, and the preparation of administrators and directors. A master plan similar to the Nieman fellowships in journalism was suggested.

Other Services Recommended

The group also recommended that educational stations make known the possibilities of radio to the public, its sponsors, and to educational administrators.

They proposed the establishment of:

Central service for sharing tape or transcribed programs.

Regional FM educational networks.

A national educational transcription service on a regular distribution schedule.

A permanent administrative office.

Cooperation with the rest of the industry was also considered by the group as an important part of the 12-point plan. "Now, as never before, educational institutions are challenged to take an active part in the development of broadcasting."

DIXON ACCEPTS POSITION

Harry M. Dixon, assistant in economics, has accepted an appointment to be associate professor of business administration and economics at James Millikin university. Dixon will take over his new duties Sept. 1.
